PROJECT APPLICATION
Modoc County Department of Agriculture

I. Project Overview (FAC 7272.5)

Project Goals and Objectives (check all that apply):

- Increase the profitability and value of crop land and rangeland
- Decrease the costs of roadside, park, and waterway maintenance
- Reduce the fire hazard and fire control costs in the state
- Protect the biodiversity of native ecosystems
- Maintain the recreational and aesthetic value of open space, recreational, and public areas
- Increase water supply and flow

Project Activities (check all that apply):

- Operation of programs by the county agricultural commissioner for control of noxious weeds along county roads and other local government owned property
- Matching funds for control of noxious weeds on city owned streets, parks, rights-of-way, and other public areas
- Disseminating biological control agents by the county agricultural commissioner for the long-term control of yellow starthistle or other noxious weeds
- Abatement of noxious weed infestations on land vital to the success of the program

II. Project Plan

Weed Species to be Controlled:

All noxious weeds in Modoc County will be controlled.

Methodology:

Modoc County Department of Agriculture is looking to purchase hardware to run GPS, outreach, education, and a pickup in order to perform surveys of noxious weeds, and to develop mapping of the noxious weeds in the county. With the GPS system Modoc Department of Agriculture will be able to accurately identify areas of noxious weeds, track the areas of noxious weeds and increase outreach to the community with problem areas within the county. The county Agricultural Technician, Agricultural Inspectors, and weed abatement crews will be able to survey, map, and eradicate noxious weeds in order to better understand the problematic areas. The purchase of a pickup will allow our Agricultural Technician and Inspectors to navigate throughout the county to perform detection, mapping and eradication. The truck will allow travel around the county to locate areas of weed growth, continue to check those areas for effectiveness of treatment as well as to help with eradication. To keep maps up to date, we will download mobile apps on the hardware we are able to purchase with this grant. Modoc Agriculture department is currently looking at several mapping apps that have been recommended to easily and efficiently start a GPS based mapping of noxious weeds. Several members of the Agricultural Commissioner's office will be able to have the technology with the purchase of the hardware to start mapping the county. The hardware will enable them to update maps in the field and share data collected with everyone. With the purchase of a laptop, projector, and screen Modoc County will be used them during growers meetings and other outreach programs for education of producers in Modoc County about noxious weeds that are posing problems in the county.

Modoc County is CEQA exempt and we will provide documentation.

Location(s):

Mapping will be conducted throughout the county of Modoc.

Weed Removal/Control Techniques(s):

Modoc County has an intensive spray program that involves a spraying crew which conducts chemical control of noxious weeds. Currently, the pesticides Modoc County uses for eradication are Weedone LV6 EC, Telar XP, MadDog K6, and Milestone as the main source of chemical control of noxious weeds.

Tracking and eradicating all noxious weeds can prove difficult without GPS software in place, to speed the eradication up. Modoc County, with no current GPS mapping program, will need to take time to map the noxious weeds in the county. The time to map noxious weeds could otherwise be used for weed eradication. However, with the recent hiring of an Agricultural Technician who has experience with mapping weeds, they will be able to focus on the initial setup and to start mapping new areas of noxious weeds. During this time seasonal spray crew and crew manger will be able to continue focusing on eradication of noxious weeds. With the addition of a pickup it will give the Agricultural Technician the ability to move throughout the different parts of our county in order to perform mapping in addition to help with the eradication program the county currently has in place.

III. Reporting

Grant recipients will be required to submit a mid-year report to CDFA documenting a visual representation of the project's progress on September 1, 2020.

Final project reports are required 30 days after project completion, no later than January 30, 2021. Final project reports should include detailed information on project results and include photos of field work showing progress (before/after photos).
